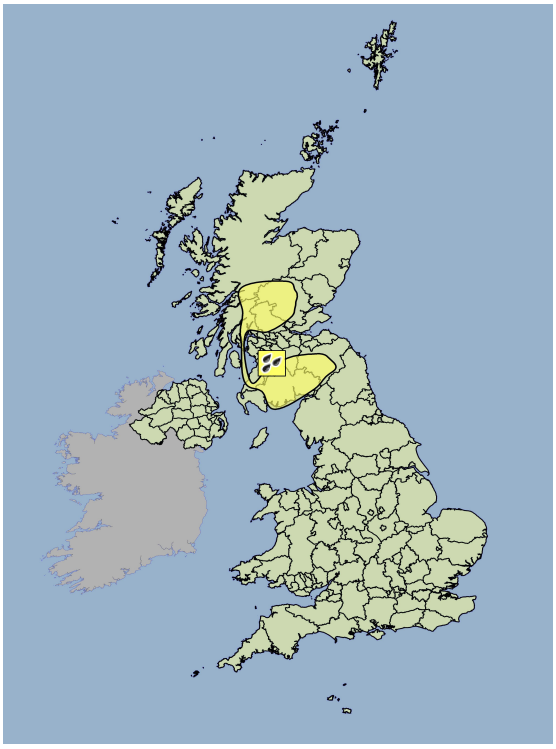
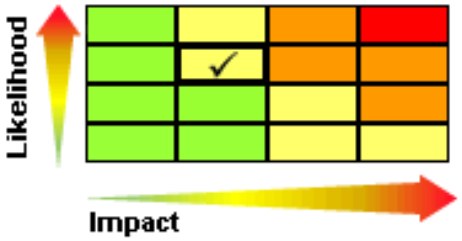
National Severe Weather Warning Service





Chief Forecasters Assessment
Another active Atlantic frontal system will cross eastwards across Scotland on Wednesday evening and overnight, clearing early on Thursday. The heaviest rain will be over the Southern Uplands and Southern and Central Highlands, with 20-30mm falling in a 9-12 hour period and locally 40-50mm over the hills. Some snowmelt is likely to add to the risk of flooding, mainly in the north of the warning area.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **18:00 on Wed, 23rd Dec 2015** until **08:00 on Thu, 24th Dec 2015**

Another spell of heavy rain will spread from the west on Wednesday evening, lasting much of the night, before clearing east into the North Sea early on Thursday morning. The rain will be accompanied by gale force south or southwesterly winds, these possibly reaching severe gale for a time, though easing by Thursday morning.

Please be aware of the risk of localised flooding and some travel disruption.
